

Candoo How To use the Control Center (iPhone/iPad)

To print this guide, go to "File" and click "Print".

What is the Control Center

Control Center gives you instant access to the things you do the most. You can use Control Center to quickly take a picture, decrease/increase your volume, control your hearing aids, and more.

The control center is available on mobile iOS devices (iPad or iPhone). This is a great quick feature to access controls to your devices. The benefit of using this is that it's always accessible from any screen on your device. Whether you are currently using an app or if your device is locked you can access this control panel.

For iPhone 8 devices or earlier

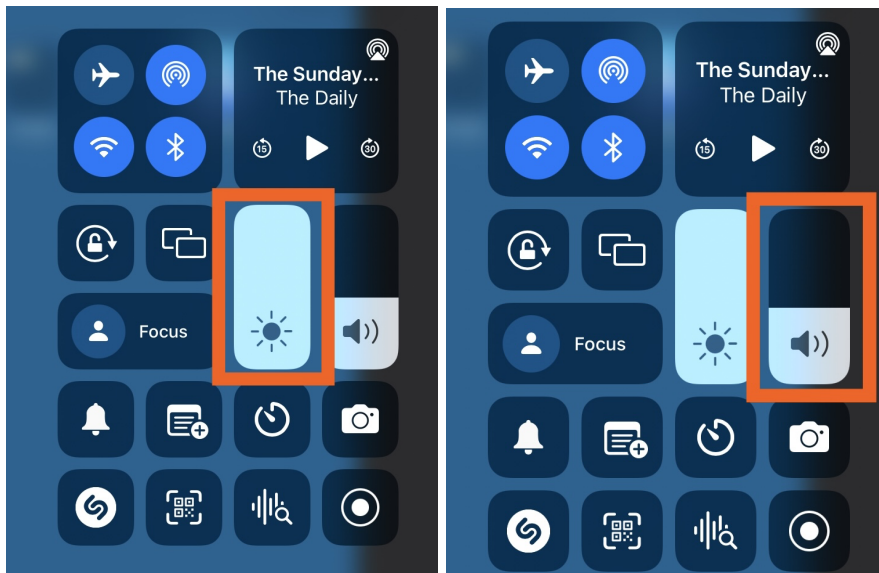

To open the control center swipe up from the bottom (near the home button) of your screen.

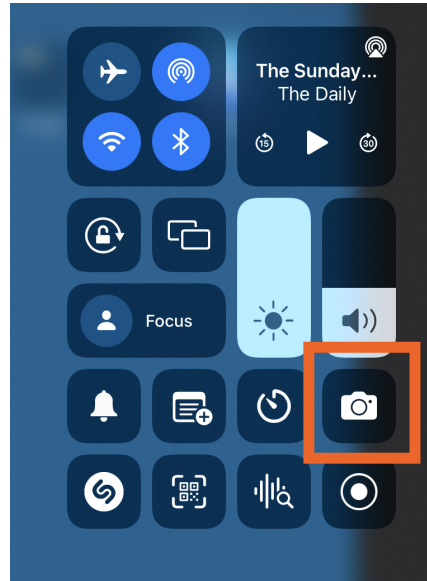

How to use the Control Center

With the Control Center open, you can adjust the screen brightness and volume, access shortcuts to apps, and more!

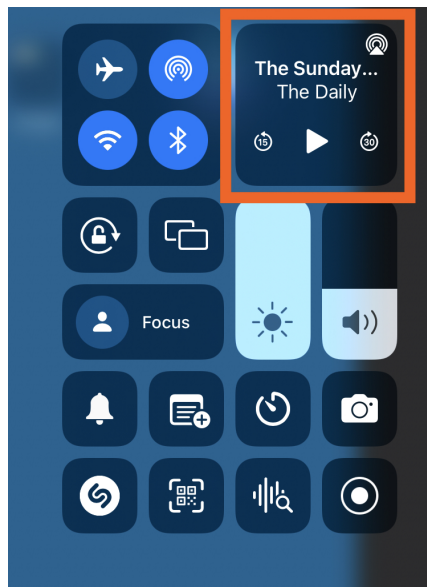

Step 1 - Move the scroll to change the brightness of your screen or to control your volume.

Step 2 - Tap on the camera icon to take a photo or video.

Step 3 - You can also control any media (music, podcasts, etc.) that are playing.

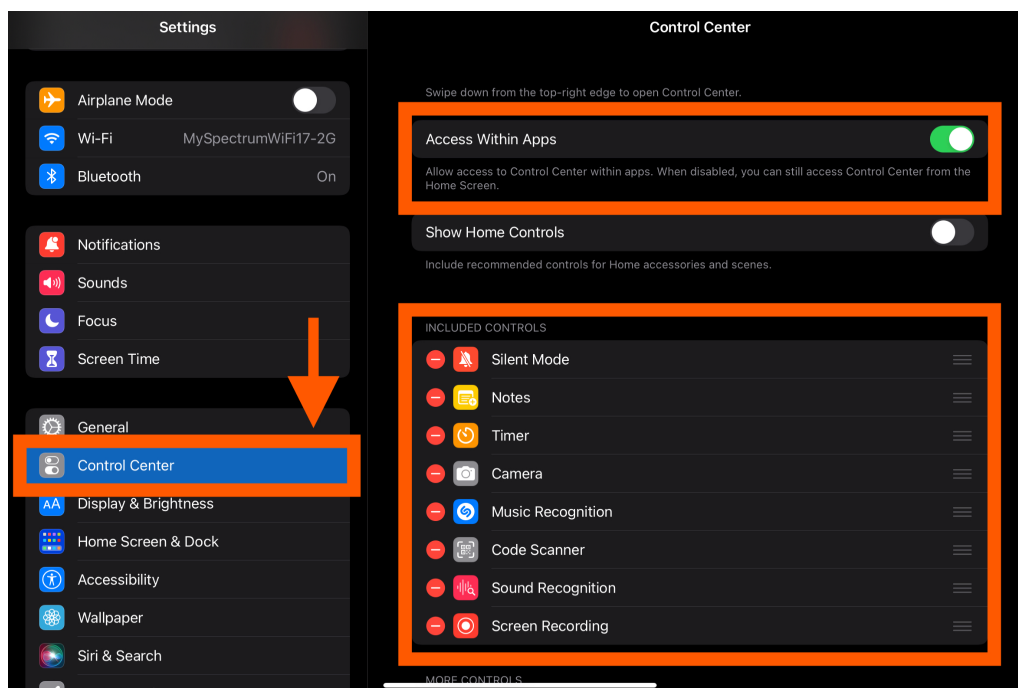

How to add Controls to the Control Center

Step 1 - Open the settings app (Gear icon).

Step 2 - Tap on the 'Control Center'

Step 3 - Ensure that the switch to the right of 'Access Within Apps' is highlighted green.

Step 4 - Add or remove the controls you want to appear in the Control Center. Tap on the green plus sign (+) on the left side of the control you want to add. You can also tap on the red minus sign (-) to remove control.
