How to Add an App to your Home Screen

Step 1

Make sure that the iPhone is powered on and you see the home screen (below screen is an example).

If the iPhone is off, turn it on. If you need assistance powering on your iPhone, refer to page 7 on the “iPhone Guide, Part 1” for instructions for how to turn on your device.

Step 3

Tap and hold on to the app icon that you want to place on your Home Screen until a menu pops up. Tap on "Add to Home Screen".

Please Note: if you do not see the app you would like to add to the home screen, tap on the search bar at the top to view a list of all the apps installed on the iPad and complete the instructions provided for Step 3.

How to Move Apps on your Home Screen

Step 1

Tap and hold on the app icon you'd like to move until you see a light gray rectangle appear near the app icon. You can then lift your finger and tap on the 'Edit Home Screen' option. Then tap and hold on the app icon- **Without lifting your finger**, drag the app to the new location, then lift your finger.

How to Install Apps from the App Store

Step 1

Open the “App Store” by tapping on the app icon highlighted below on the left screen.

If the App Store is not present on your home screen, refer to pages 3 and 4 to view all apps from the App Library.

Once the main screen for the App Store appears, tap on the search button at the bottom right of the screen.
