What is **password management**?

Password managers are services that help us create, securely store, and quickly autofill passwords.

They provide a more seamless way to store our passwords and keep secure credentials in one space.

Since there are a multitude of accounts everywhere we can sign up for this is a way to save your passwords with peace of mind.

Why are **password managers important**?

The Benefits of Password Management:

- Never Having to Memorize Another Password
- Additional Security for Passwords
- Complex Password Creation
- Faster Access
- Adding Associated Information

The Importance of a Strong Password:

- Your password safeguards any online account
- Technology is causing more opportunities for hackers
- Reduce the risk of hackers guessings your password

Cons

- Poor customer support and only for premium members
- Costly compared to the competition
- Uses third party trackers

Below are additional details and screenshots of LastPass:

Log in and go

Once you save a password in LastPass, you'll always have it when you need it; logging in is fast and easy.

Simplify online shopping

When you're ready to make a purchase, your profile will fill all your payment and shipping details for you.

Generate strong passwords

The built-in password generator creates long, randomized passwords that protect against hacking.

Store digital records

Insurance cards, memberships, Wi-Fi passwords... keep all your notes safe and easy to find.

Share effortlessly

Some things shouldn't be sent in a text. Conveniently and safely share passwords and notes with anyone.

Dark web monitoring

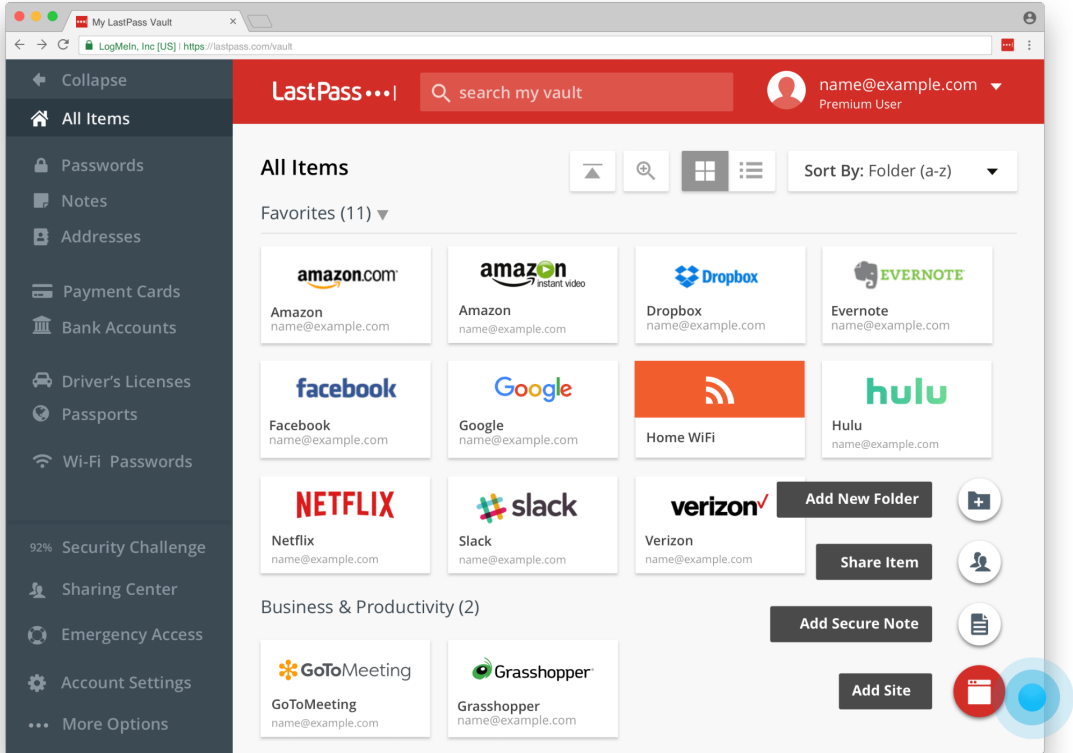

Stop worrying about data breaches. Get alerts if your personal information is at risk.

Conclusion

Password Managers are tools we can use to create and secure passwords.

We still need to exercise caution with who and where you input your usernames, passwords, credit card info, social security info, etc.

Password Managers do NOT prevent you from being a victim of a cyber attack.

They are simply a tool to help you remember and store unique passwords.
